

Don't get  
caught out

Insist on double  
protection

enzovax<sup>®</sup>

toxovax<sup>®</sup>

The *only* licensed combination

# Dual threat

The dual threat of enzootic abortion and toxoplasmosis is present in 4 out of 10 UK sheep farms<sup>1</sup>

## Enzootic abortion

- Enzootic abortion accounts for 50% of all abortions in sheep<sup>1</sup>
- An enzootic abortion storm can take up to 25% of your lambs
- Abortion during late pregnancy and stillborn lambs are common

## Toxoplasmosis

- 4 out of 10 farms with enzootic abortion also had toxoplasmosis present on the farm<sup>1</sup>
- 7 out of 10 farms in the UK have ewes infected with *Toxoplasma gondii*, the parasite that causes toxoplasmosis<sup>1</sup>
- Toxoplasmosis causes losses at all stages of pregnancy, resulting in barrenness, abortions, stillbirths and weak lambs

# Double protection

Only Enzovax and Toxovax are licensed for use at the same time to provide protection against enzootic abortion and toxoplasmosis

- Enzovax helps protect against enzootic abortion
- Toxovax helps protect against toxoplasmosis
- You only have to gather the flock ONCE to vaccinate for both
- You save time, money and effort now – and you save lambs later

# Enzovax/Toxovax Order Form

Please advise us of your requirements as soon as possible by returning this card or telephoning the practice

I require sufficient Enzovax to vaccinate \_\_\_\_\_ animals

I require sufficient Toxovax to vaccinate \_\_\_\_\_ animals

Vaccine required during week commencing \_\_\_ / \_\_\_ / \_\_\_
