

Keep a lid on it.

**INTEGRATED
WORM CONTROL**

Experts agree. Wormer resistance is on the up.

And it's going to get worse in the future. However, there is a way to keep on top of it. Because by using new Vectin 0.08% in combination with Panacur SC and Levacur SC, you can be sure of getting the right solution for your flock. Every time. In short, you can now firmly keep a lid on wormer resistance.

For more details, call 01908 685685 today.

Vectin 0.08% contains ivermectin Ph. Eur. Panacur SC 2.5% and Panacur SC 5% contain fenbendazole Ph. Eur., elemental selenium and elemental cobalt. Levacur SC 3% contains levamisole hydrochloride Ph. Eur., sodium selenate and cobalt sulphate heptahydrate. Further information is available on request. Legal category **PML** ® Registered trademarks.
