SenseHub® Dairy

In-Line Somatic Cell Count Sensor

Providing individual SCC results in under two minutes

The SenseHub In-Line Somatic Cell Count (SCC) Sensor from MSD Animal Health provides somatic cell counts for individual cows at the milking point within two minutes of cupping – automatically.

SenseHub Dairy's SCC sensor works with any existing parlour type – fitting into your milking routine with no additional steps.

Measure where it matters

Fully connected to the SenseHub Dairy system

SenseHub® DAIRY

MSD Animal Health

MSD551_SenseHub_Dairy_Flyers_I-LSCCS-v1.indd 1 12/08/2024 10:11

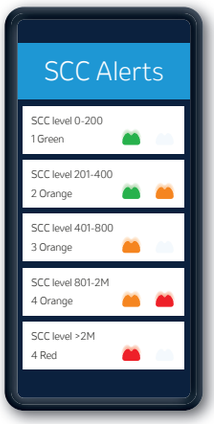
Freedom is knowing you're actively gaining control over your milk quality

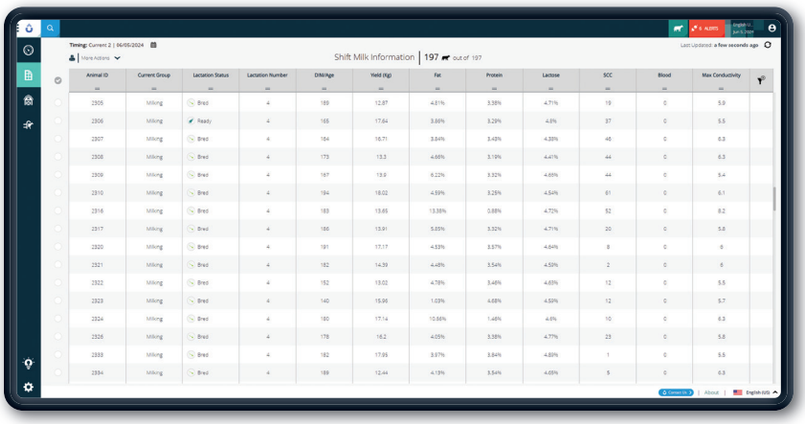
Guides on bulk tank SCC levels (cells/mL)[1]	
< 150,000	Excellent SCC control
150,001 - 200,000	Good control of SCC
200,001 - 400,000	Unstable control of SCC - review udder health management
> 400,000	Indicates little/no control and urgent action is needed - seek help

SenseHub® Dairy

In-Line Somatic Cell Count Sensor

- Promptly identify animals with high SCC.
- Further investigate a potential udder health issue.
- Make better informed dry cow therapy decisions.
- Improve milk quality and herd well-being.
- Results stored and displayed in the SenseHub Dairy system.





The results are displayed at the milking point based on optical warning light alerts as well as in absolute values for individual cows in the SenseHub Dairy system.

Farm with **more freedom** through a deeper connection to your animals
