

Fleas

are the most common parasite that threatens your pet – and they're much nastier than just an itchy nuisance

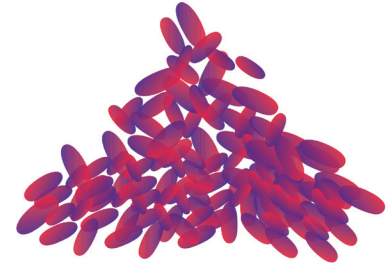

**Time to
protect
YOUR pet**

This information is provided by MSD Animal Health, manufacturer of **BRAVECTO**[®]

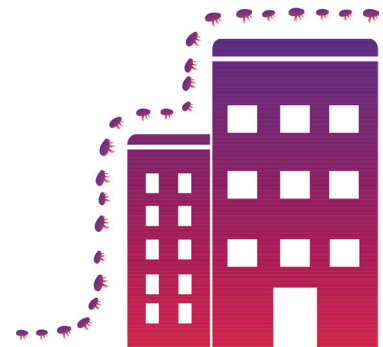

Flea facts

- An adult flea lays up to 50 eggs a day – that's up to 2,500 eggs in your home after 50 days

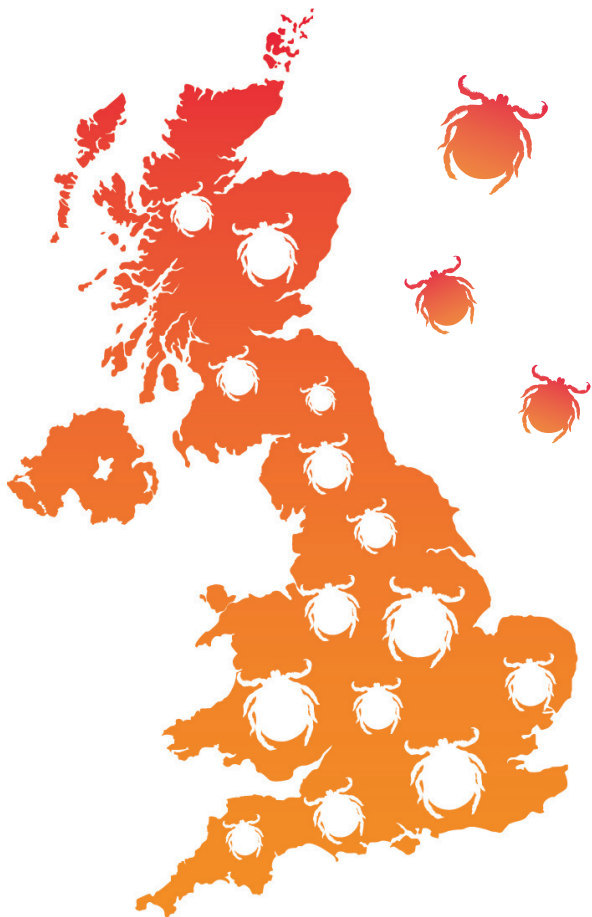

- Fleas can carry nasty diseases that can be passed on to your pet – and your family

- Fleas can jump almost 150 times their own length – so they get everywhere

Find out here about why you need at least 12 weeks' continuous protection

Ticks

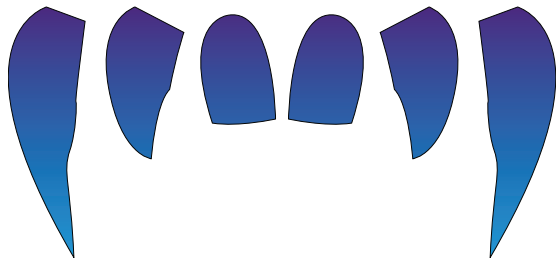

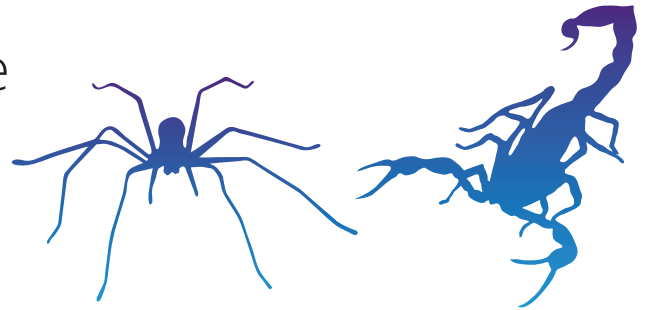

are travelling
– and their
numbers in the
UK are growing

**Time to
protect
YOUR pet**

Tick trivia

 Ticks aren't insects – they're arachnids, like spiders and scorpions

Ticks are vampires!
They love sucking your pet's blood – and yours

 Ticks can carry serious diseases for both pets and humans – including Lyme disease

Don't use garlic – talk to us about how best to protect your pets against ticks

Fight fleas and tackle ticks

Protect your pet AND your family
