

We believe that we earn the right to operate by being effective stewards of the environment, and that improvements to our energy performance is achievable.

By continuously striving for excellence in energy performance, we also protect, enhance, and create business value for organisation.

At all UK Animal Health sites we commit to:

Comply with the letter and spirit of all applicable legal requirements which relate to energy aspects and, so far as practicable, accepted best practice in energy management.

Continuously improve our energy management system, processes and integrate throughout our business by reviewing performance setting objectives to drive performance.

Provide appropriate resources to build individual's knowledge and capabilities alignment to achieve these commitments.

Promote energy performance from our operations, products, and partnerships. Including the purchase of new equipment, major renovation, and new design.

Foster a culture of energy excellence built upon awareness, integrity, collaboration, and the active participation of all our staff.

Engage stakeholders by communicating our progress and performance.

At MSD Animal Health UK we strive to improve energy performance and run our operations as efficiently as possible, in the manufacture and supply of animal health products and services.

Our Energy management system will be consistent with ISO 50001 standard and will be subject to review by both, the senior management of the company and external verification.
